

Online options without supplier chasing

Public sources give us alternatives, not a finished filter selection. Prefer a sensibly priced, replaceable local component over forcing an expensive import into the current cabinet.

IKEA STARKVIND 104.633.30 | Rs 1,090 each displayed

Official India page: 370 x290 x40 mm. Two filters: Rs 2,180 before delivery. Local availability is not confirmed. OEM limits intended use to STARKVIND appliances; custom use is experimental, not endorsed. No published low-flow pressure curve found.

Smart Air Sqair replacement | 264 x264 x50 mm

Official India replacement-filter route; current price not verified. Smaller face and greater depth than D01 reference. OEM India/global pages differ in H12/E12 terminology. Not H13, not a drop-in, and appliance CADR cannot transfer to our fans.

3M Filtrete MPR1900 | nominal 20 x20 x1 inch

India import listings display Rs 19,801 and Rs 41,464 for four, despite the same stated ASIN. Conflicting actual dimensions and no authenticated exact low-flow curve. Keep as an alternative; do not recommend these costly listings for purchase.

Decision: stop treating supplier correspondence as your task. Continue with an interchangeable filter interface and a measured-flow commissioning route. Missing public data stays unknown; no invented pressure curve, MERV equivalence or guaranteed output.

Actual interface: why these are not drop-ins

Centred envelope comparison / mm

R01 cabinet opening: 470 x470

Actual gasket: 495.3 outside / 475.3 inside

STARKVIND: 370 x290 x40

Sqair: 264 x264 x50

The smaller filters leave large open bypass areas. A sealed reducer, matching support and retention are required; placing them behind the old opening is not a working assembly.

Correction: our previous inquiry incorrectly stated a490/470 mm gasket. Reopening the saved R01 CAD confirmed495.3/475.3 mm. The470 mm dimension belongs to the cabinet opening.

The drawing compares dimensions only, not a manufactured gasket landing. Public sources do not yet establish frame-border flatness, clamping force, pressure loss or custom-use suitability. No filter class or performance transfers from another appliance.

Sources: official IKEA India STARKVIND and Smart Air India filter pages; 3M airflow page; observed Desertcart listings; CEC2018 laboratory report. Exact links, dates and limitations: data/prototype_d01/online_filter_screen.json.
